Toplines

These are MAGA-led Trump-like political attacks masterminded by the same members of the House who supported a violent criminal conspiracy and the January 6th attack on our country. Sixteen of the members of the MAGA-led House Oversight Committee voted against certifying the 2020 election, and three asked for pardons.

MAGA Republicans have taken over the House. Speaker McCarthy sold his soul and the Speakership to the most extreme MAGA members of the House. It's obvious that MAGA leaders like Marjorie Taylor Greene, Jim Jordan, and Matt Gaetz are calling the shots in this Congress and leading these Trump-like political attacks. They have been given seats on key committees and would rather spread conspiracy theories than tell the truth.

This is all about politics and damaging this administration and this President, so MAGA can gain more power and take away our basic freedoms. They will not rest until they take away our basic freedoms, including our freedom to choose when to have a baby or marry the people we love, or choose our own leaders. Jim Jordan, Chair of the House Judiciary Committee, and James Comer, Chair of the House Oversight Committee, have admitted their investigations are about nothing more than politics - [re-electing Donald Trump](#) and [defeating Joe Biden](#).

MAGA politicians are willing to do anything to gain power. These political attacks are led by the same MAGA politicians who supported the criminal conspiracy to overturn the 2020 election and who continue to condone political violence and hate. Many knew they were committing crimes and asked for pardons.

They care more about their extreme MAGA agenda than the real issues that keep Americans up at night. They have the wrong priorities. MAGA Republicans have made clear that the issues that concern hard-working Americans will take a backseat.

They defended corruption in the Trump administration and have no credibility. They defended corruption in the Trump administration and have admitted their primary objective is to damage President Biden. When Ivanka Trump and Jared Kushner pocketed more than \$500 million while working in the White House, including from Saudi Arabia and China, these MAGA politicians defended them and voted against subpoenas to get to the truth. To this day, they continue to defend the worst of Donald Trump.
